

OMERASTORE TERMS OF QUOTATION

Our General Standard Terms and Conditions/Purchase Conditions apply. These are open to inspection at: www.omerastore.com.

Non-conforming general terms and conditions are herewith explicitly rejected. We supply subject to reservation of ownership. Binding notice period for quotations is 30 days, provided that nothing different is indicated. The term of payment begins with the (electronic) conveyance of the invoice. Inadmissible deductions are subject to further claim. For goods which are not fetched, a storage charge is levied from the 4th month after completion notification in the amount of 1.0% of the goods value per month. Max. time for storage deposition: 12 months. All information subject to reservation of punctual self-supply.

All documents sent and made available are to be used exclusively for working on the project. Forwarding to third parties is strictly prohibited. For any forwarding, the written authorisation of OMERASTORE GMBH is required. Copyright of omerastore®.

OMERASTORE generates a standard calculation within the framework of a commissioning. All further documents and drawings are to be instructed and compensated separately. Responsibility for checking statics and the obtaining of authorisations in connection with the actual structural and legal conditions on site is with the customer. Basically the calculation is implemented without the inclusion of a seismic load.

All information and documents sent in the offer phase are provisional.

All quotations are based on the information provided by the customer exclusively. OMERASTORE does not assume any liability in connection with incorrect, incomplete or faulty information made available customer-sided. Responsibility for the selection of the coating is with the customer. In case of changes of output values, we reserve the right to re-work the quotation or to withdraw completely.

All quotations are pure offers of supply without installation or preparation of the construction site. Preparations of the construction site, including foundation, are to be provided on site and equipment for this is not part of the quotation and supply. The specifications related to a supervisor (chief fitter) and the required time, as well as about necessary equipment, are always to be considered as purely informative and are not a component part of the quotation. OMERASTORE is not responsible for the installation or for the consequences of the installation.

All prices are net ex-works (INCOTERMS 2010) D-08315 Lauter-Bernsbach/Germany and in Euro. All prices are subject to the steel-price variation clause. Prices for complementary purchase parts or performances are always provisional. The guarantee always refers to the enamelled surface of the plates. The enamelling has chemical resistance in accordance with the datasheets of the respective surface quality. With the revision of a quotation, all former revision states are invalid.

The quotation includes the offered quantity for the prices quoted. All orders require the written form and are accepted after generation of a confirmation of order.

All goods are packed on wood pallets suitable for sea-going freight. Packing sequence: One (max. two) plate thicknesses per pallet, thicker below, thinner above. Maximum weight per pallet 2.5 tons. A truck with side loading is required for the loading.

Cathodic corrosion protection is not a component part of the quotation or scope of delivery.

Enamelling on the basis of EUROPEAN ENAMEL AUTHORITY e.V. (EEA) 7.20 or 7.24 or 7.25, if nothing different is specified in the item. Hot-dip galvanising for steel construction elements on the basis of DIN EN ISO 1461. The enamelled surface can be influenced by the opposite side in the hole area. This does not represent any reason for complaint.

Do not allow any work with flying sparks (welding, angle grinding ...) to be carried out in the area of the enamelled plates. This can lead to severe damage. Protect the plate generally during storage and transport until immediately before installation. Note that some components require special storage (e.g. frost-free) and that some materials have an expiration date (e.g. sealing material). The identification of the container, including the application of notes on safety, is the responsibility of the customer.

If one of these points of this declaration should not be permissible legally, this does not have any influence on all other points. The invalid point will be replaced by a point with corresponding content. All current datasheets are a component part of the quotation. The language of all documents is German and the equivalent in English. Place of jurisdiction is 08280 Aue / Germany. German law applies exclusively.
